

GST Software

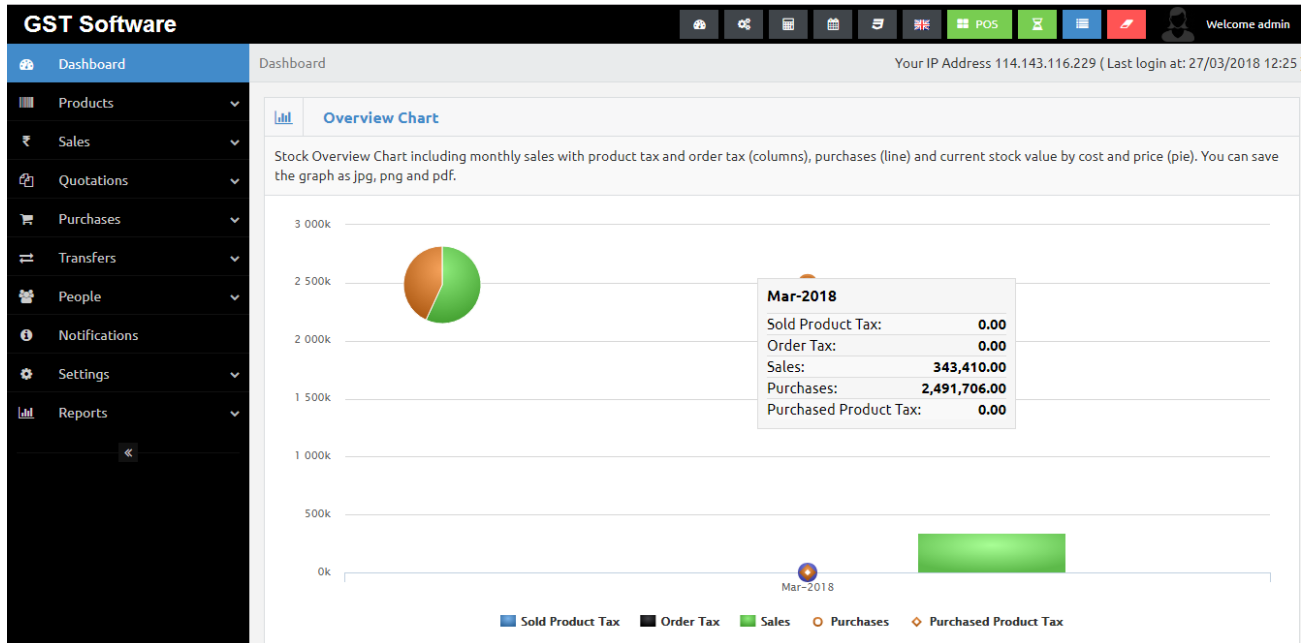

Goods and Services Tax is the new unified, multi-stage and consumption based tax levied on manufacture, sale and consumption of Goods and Services at national level to replace all the existing national and state tax systems like VAT, Service Tax, Excise Duty, etc. It is expected to remove the cascading effect of tax-on-tax which is prevalent presently. It is applicable to you if you are into Manufacturing, Trade, E-commerce or Services.

Get instant reports on your business performance

Generate an accurate profit and loss statement, which details whether the business is operating at a profit or a loss for a specific period of time. Run and customized balance sheet reports to help identify and analyse trends in your business, especially for accounts receivable and accounts payable. Display your income and expenses in year-over-year comparisons using pie charts and bar graphs in the Company Snapshot.

What do we provide?

Flexible App:

This software is designed to work perfectly with all versions of Windows, from XP to 10, so that you or your company can start invoicing quickly and efficiently without any compatibility concerns.

Powerful Admin Panel:

- Generate an accurate profit and loss statement, which details whether the business is operating at a profit or a loss for a specific period of time.
- Run and customised balance sheet reports to help identify and analyse trends in your business, especially for accounts receivable and accounts.
- Display your income and expenses in year-over-year comparisons using pie charts and bar graphs in the Company Snapshot.

Best Inbuilt Features:

- Reduces manpower cost and time consumption.
- Secured Data.
- Direct data transfer to CA and STP's Tally software.
- Easy to use.

Our Growth

All your data is safely stored and secured on your PC. The backup and restore feature helps to protect your invoicing database from unfortunate events or to transfer it from one PC to another.
